Eradicating poverty remains one of the biggest challenges facing humanity today and the primary focus of Wiki Impact's Poverty Project.

Out of the 17 United Nations Sustainable Development Goals (SDG), 'No Poverty' is the first. The stakes are high, human lives are on the line. It is of utmost importance that together, as a nation, state and community, work together to eliminate poverty.

End poverty in all its forms, everywhere.

We usually associate poverty with a lack of money – not being able to afford to put food on the table or having a roof over your head. While poverty definitely includes not being able to meet basic needs including meals, clothing and shelter, it is also about so much more than that.

"Fundamentally, poverty is a denial of choices and opportunities, a violation of human dignity. It means lack of basic capacity to participate effectively in society. It means insecurity, powerlessness and exclusion of individuals, households and communities." United Nations, 1998

Let us restore human dignity, give back voices to people and provide opportunities where everyone can not only survive, but thrive.

Spotlight on Poverty is a series that aims to highlight the needs and gaps in the poorest districts of every state in Malaysia.

What's in this report?

This comprehensive report will give you grand overview of how the district is fairing. Poverty is a complex and interconnected issue that impacts on other issues of society.

The report will cover the following:

- Socio economic overview
- Employment
- Basic Amenities
- Education (Primary and Secondary)
- Healthcare
- Internet & Connectivity

How can this report be used?

If you're a changemaker (NGO, association, government led initiative, social investor) that is involved in alleviating poverty, this data will help you to make impactful and informed decisions on where to channel and focus your resources and efforts.

The data will also help policy makers and communicators better understand the state of poverty in these districts.

Let's work together to give a voice to the voiceless.

SPOTLIGHT ON POVERTY:

BESUT, TERENGGANU

Bordered by the state of Kelantan to the north and to the east, the South China Sea — Besut is a district in Terengganu. Its district capital is Kampung Raja although Jerleh is a much more developed district. Kuala Besut has a fishing port which also happens to be another major town thanks to its activities.

Historically, Besut was known as the Kingdom of Besut Darul Iman and according to Munshi Abdullah — a Malaysian historian, Besut was established by a group of pilgrims from Patani and Sumatra led by Che Latif of Palembang. Their arrival was met with a group of indigenous Orang Asli who previously settled down in the area. After the relocation of the Orang Asli, Che Latif and the pilgrims began constructing a settlement — naming the place Palembang, after their place of origin.

Image: Kuala Besut, Terengganu

Pulau Perhentian is the most popular tourism site which is located in Besut — rated among the top island destinations in the world by CNN. Located about 20 km from the northeastern point of Kuala Besut, it consists of a few islands famous for their snorkelling activities, scuba diving and breathtaking coral reefs.

Besides the local beaches, visitors can opt to experience the tropical forests in Lata Tembakah and Lata Belatan or a hike up Gunung Tebu. There is also a natural hot spring known as the Kolam Air Panas La where visitors could head over for a hot bath.

BESUT IN GENERAL

Brief overview of the population & poverty in Besut

Population Size Besut
(2019)

Constitutes of **13.80%** of
Terengganu's population

An explanation of the terminologies used in this Spotlight

Absolute poverty- "The most severe type of poverty where there is a severe deprivation of basic human needs, including food, safe drinking water, sanitation facilities, health, shelter, education and information. It depends not only on income but also on access to services." (UN 1995 report of the World Summit for Social Development)

Relative Poverty- It is when impoverished households earn 50% less than the national median household incomes. This means that the household does have money, however they do not have enough money to afford anything other than the basics. This type of poverty is also dependant on the economy of the country, and as such is subject to change from time to time.

GINI Index- It is defined as the measure of statistical dispersion intended to represent the income inequality within a nation. It is calculated using a specific formula and the results determines the different levels of income inequality.

GINI Index:

- <0.2 = perfect income equality
- 0.2-0.3 = relative equality
- 0.3-0.4 = adequate equality
- 0.4-0.5 = big income gap
- >0.5 = severe income gap

The bigger the number of the GINI index, the more severe the income inequality. Anything less than 0.2 represent perfect income equality, while anything higher than 0.5 represents a severe income inequality. Any number between 0.2 and 0.3 is considered an adequate safe value. A value of 0.4 is considered the warning level that immediate action must be taken to reduce income inequality.

An explanation of the terminology used in this Spotlight

Labour force- It represents the group of people in the population that are currently actively looking for work, or already working.

Outside labour force- Refers to the group of people that are not actively looking for work. Example : Pensioners, school children, infants, and housewives.

Employed force- The group of people within the population that are currently working for pay at least one hour per week.

Unemployed force- The group of people within the population that are currently able and looking for work, but not yet hired.

Gross output- "The total output of a firm, industry, or economy without deducting intermediate costs." (Collins Dictionary)

This means that the Gross Output of an industry is the immediate value of their output/sales, without taking into account the cost of labour and production.
